Project Update - #1

CTH-DD Bridge over Honey Creek

June 1, 2017

Work has begun this week on replacing the CTH-DD Bridge Over Honey Creek, located on the north end of Honey Lake in the Town of Spring Prairie. The road was closed to through traffic on Tuesday, May 30th and removal operations are already underway. It is anticipated that the road will remain closed until Labor Day. We will be sending out periodic project updates as the work progresses.

The posted detour route uses STH-11, STH-120 and CTH-D. Motorists may also find other suitable alternate routes. A copy of the detour map is posted on the Walworth County website. Look for the "Highway Updates" link on the Walworth County Home Page, or use the link provided at the bottom of this page

Emergency services are aware of the closure. Mail and trash collection services should continue normally.

Honey Creek Bridge - Built in the early 1940's

Contractor saw-cutting old deck for removal

We would like to take this opportunity to remind everyone that construction sites and large equipment can be both attractive and dangerous to curious children. Please warn children of the dangers and keep them clear of the construction area and equipment.

We understand this is an inconvenience and appreciate your patience and cooperation during this time. Walworth County remains committed to maintaining its road and bridge infrastructure in a state of good repair. The project team and the contractor are working towards completing this project as soon as possible.
